

Develop your career in nuclear research!

Interested in preparing a PhD or performing post-doc research
at the Belgian Nuclear Research Centre?

Apply before April 2, 2010!

www.sckcen.be

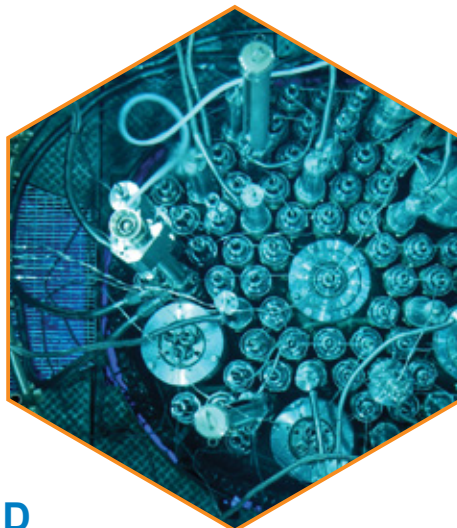

SCK•CEN is one of the largest research centres in Belgium. Today, more than 600 employees advance the peaceful industrial and medical applications of nuclear science.

Our statutory mission gives priority to research on topics of societal concern: safety of nuclear installations, radiation protection, safe treatment and disposal of radioactive waste, education and training.

SCK•CEN's activities go -literally- from the deep underground to outer space and are concentrated into the following main research areas:

- Nuclear Materials Science
- Advanced Nuclear Systems
- Environment, Health and Safety

SCK•CEN wants to extend its team of young scientists, and supports PhD candidates and post-doctoral researchers. The research topics to be studied are described in detail on www.sckcen.be/PhD. On this website you will also find the guidelines for application.
